

The Mauritius-Seychelles relation is driven by strong affinities. The two countries share the same ocean, language and both are members of **SADC**, **COMESA** as well as **IOC**.

Unlike Mauritius, Seychelles is, however, not endowed with a strong manufacturing base. Consequently, Seychelles imports a large share of its consumables. This presents an opportunity for Mauritius, which can supply Seychelles with quality products at duty-free rates and under short shipping times.

To consolidate domestic export with Seychelles, Enterprise Mauritius is organising a fair in Victoria for Mauritian companies across all sectors. The objective of this promotional event is to strengthen the visibility of Mauritius as a 'Reliable Sourcing Partner' of quality products, develop networks and also enhance the ties between the two countries.

The fair will be open to all—businesses as well as to the public in general. The event will take place over three days, starting 29th April to end on 1st May 2017.
