

Capacity Building Program for the Jewellery Sector (8th June 2017)

IMPROVING OPERATIONS EFFICIENCY & TECHNICAL ASSISTANCE IN JEWELLERY DESIGN

Empowering Jewellery manufacturers to trade internationally increasingly depends on their ability to enter into global value chains. This requires working on the supply side, enabling enterprises to manufacture products with high-export potential to the quality level required by the markets, considering trendy design at the right price.

In this endeavour, Enterprise Mauritius came up with a holistic program for the Jewellery Sector aiming to handhold Jewellery manufacturers which comprised **IMPROVING OPERATIONS EFFICIENCY & BUILDING CAPACITY IN JEWELLERY DESIGN**. The workshop was held on 8th June at Jade Conference Room, Enterprise Mauritius Office. Some 30 participants attended this workshop.

Mr Arvind Radhakrishna, CEO of EM; Mr Geerish Bucktowonsing, Division Manager of EM; Mr Yvon Floquet, Mrs Delphine Cheuret & Mr Olivier Laffeta, Consultants in Jewellery capacity programme.

This specific project comprised organisation of technical workshops and in-house factory interventions as detailed below:

- Audit of selected jewellery companies
- Conduct a workshop on Jewellery trend and design for selected European markets
- Identify the needs of operators as per latest trend in the development of export.
- Conduct one to one factory interventions
- Advise and implement best practices in production techniques
- Assist in upgrading the quality of the jewellery products
- Conduct a workshop on production management system and improving production efficiency, good housekeeping practices, application of 5S in jewellery production and product costing
- One to One design upgrade interventions
